12 Contact and next step

START HERE

What does your lawn need?

We can recommend a service after looking at the lawn and listening to your goals.

Regular Care

Keep your lawn maintained with scheduled visits.

Cleanup

Make a fresh start or manage seasonal debris.

Improve

Explore options for thin, worn or damaged lawns.

Not sure where to start?

Show us the area. We can compare maintenance, cleanup and improvements together.

FREQUENCY

How often would you like service?

Choose the visit pattern that fits your property and season.

01

One-Time

A single mowing, refresh or other agreed service.

02

Weekly

A regular visit every week when available.

03

Bi-Weekly

A scheduled visit every two weeks when available.

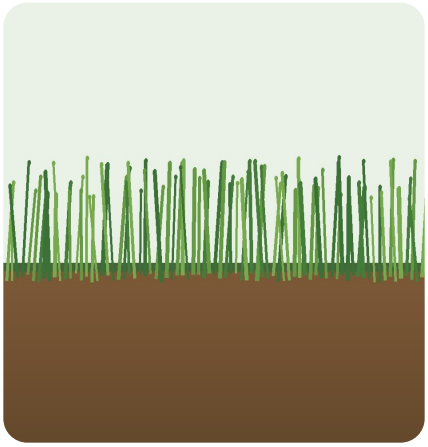

Seasonal leaf visits

Leaf cleanup can also be a separate one-time or recurring seasonal service.

MOWING

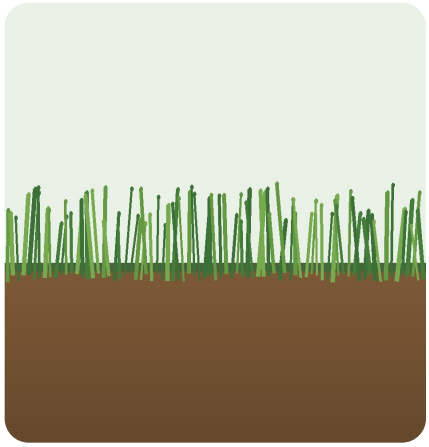

What mowing height do you prefer?

We recommend a suitable cutting height based on grass species, growth and weather.

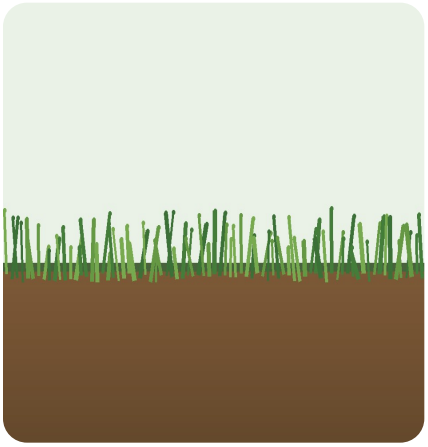

High cut

A taller, fuller look where suitable.

Medium cut

A balanced, neatly maintained appearance.

Low cut

A shorter look only where the grass tolerates it.

What is included in a routine visit?

Mowing • String trimming • Edging • Blowing hard surfaces

Good lawn care is more than a short cut.

Cutting too low can stress turf. Final mowing height is chosen after evaluating the lawn.

SEASONAL & INITIAL CARE

What kind of cleanup do you need?

A cleanup is different from routine mowing, and the scope depends on property conditions.

01

First-Time Cleanup

Overgrowth, neglected edges and an initial reset before maintenance.

02

Spring Cleanup

Winter debris, fresh edging and seasonal preparation as needed.

03

Fall Cleanup

Leaves, plant debris and seasonal outdoor cleanup.

Leaf cleanup is its own service

The next pages show how leaves can be handled, collected or removed.

LEAF CLEANUP / METHODS

How would you like us to handle the leaves?

Three common approaches. We recommend what is practical for the amount of leaves.

Blow & Gather

Move leaves to an agreed area or curbside when permitted.

Mulch the Leaves

Chop suitable amounts of dry leaves into the lawn with a mower.

Rake & Bag

Collect loose leaves into bags for the agreed next step.

Important difference

Blowing, mulching and bagging are different scopes. Final handling is confirmed in the estimate.

LEAF CLEANUP / DISPOSAL

Where should the collected leaves go?

We discuss the destination before beginning work. Removal is not automatically included.

On-Site Pile

Move leaves to an approved spot on the property.

Curbside for City Pickup

Place leaves at an eligible pickup location only where local rules allow.

Haul Away

Load and transport leaves for disposal when included in the quote.

We confirm local rules

Curbside placement and city collection depend on municipal service, location and schedule.

LEAF CLEANUP / SCOPE

How much leaf cleanup is needed?

The amount, location and frequency of leaf buildup affect the work and estimate.

Light Leaf Cleanup

Scattered leaves in the lawn and accessible areas.

Heavy Leaf Cleanup

Thicker accumulation across the lawn or property.

Garden Bed Detail

Remove leaves from garden beds and around shrubs.

Visit options: One-time cleanup or recurring seasonal visits (weekly or every two weeks, as available).

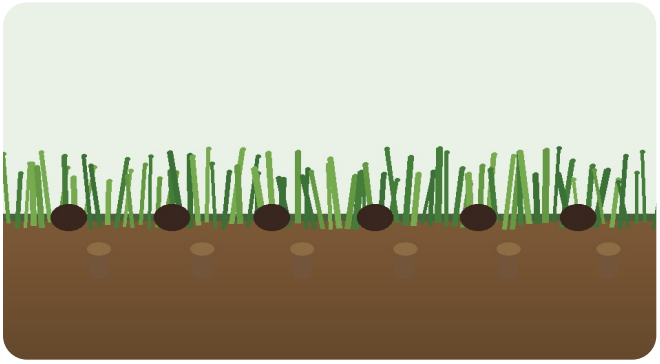

Pricing follows the actual work

We confirm labor time, the amount of leaves, access, disposal and frequency before quoting.

LAWN IMPROVEMENTS

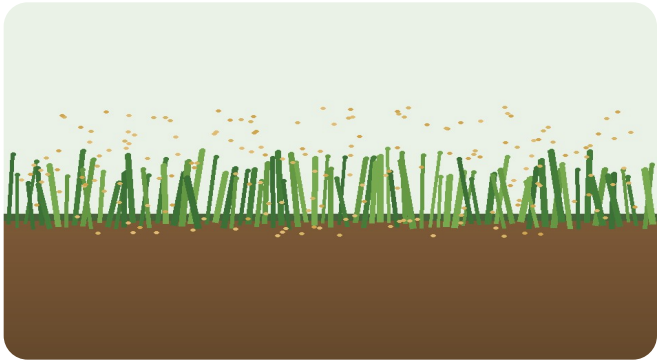

Would you like to improve your lawn?

These options depend on the turf, soil, season and site conditions.

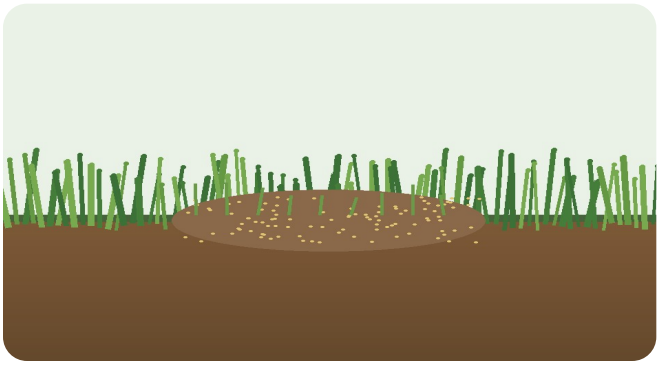

Core Aeration

Relieve some soil compaction and support root conditions.

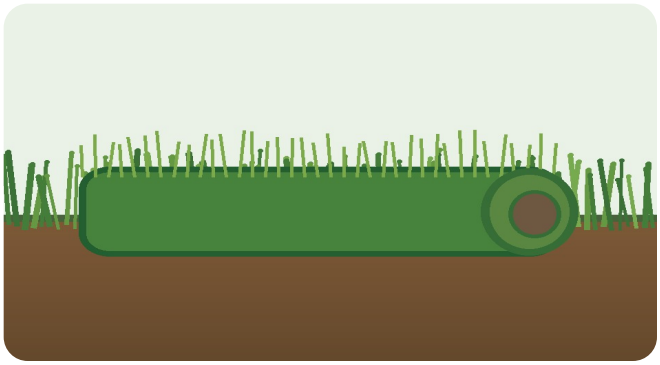

Overseeding

Thicken suitable existing turf when timing is appropriate.

Lawn Repair

Discuss worn, patchy or damaged lawn areas.

Sod Installation

Consider new turf when suitable for the property.

YOUR PROJECT

Let’s choose a service that fits.

A few quick decisions help us prepare a clear, customized estimate.

1. What needs attention?

Lawn mowing, first-time cleanup, seasonal leaves or lawn improvement.

2. How often?

One-time, weekly, bi-weekly or seasonal leaf visits.

3. What should happen to debris?

Mulch it, bag it, place it on-site or haul it away if quoted.

4. What areas are included?

Lawn, beds, edges, hard surfaces and disposal access.

Let’s care for your lawn.

Show us what you need. We will review the conditions, confirm the scope and prepare an estimate.
