How Can We Build Your Water Feature?

Every water feature can be customized to fit your space, style, and maintenance preference.

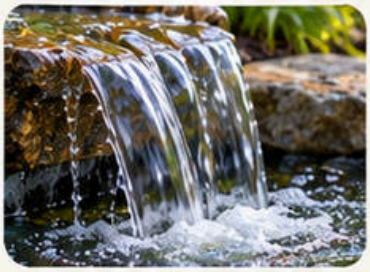

Stone Style

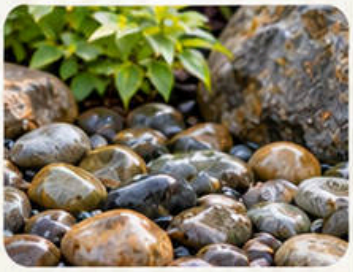

Natural boulders, columns, or decorative vessels

Water Movement

Soft bubbling, steady spill, or cascading water

Rock Finish

River rock, decorative stone, or mixed texture

Pump & Basin

Hidden reservoir systems sized for the feature

What kind of water feature would you like?

Bubbling Rock

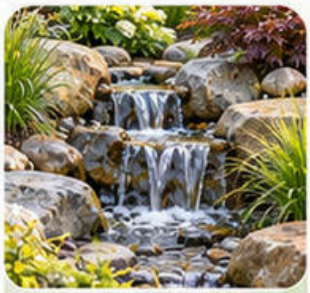

Basalt Column

Urn Fountain

Spill Bowl

Pondless Waterfall

We help you choose the right scale, stone, and water effect for your property.

Concept images for inspiration. Final selections are customized for each project.

LANDSCAPING

Bubbling Rock Fountain

A natural, low-maintenance water feature with a calm bubbling sound.

Best For

Entry gardens, small landscape beds, and quiet focal points

Stone Choices

Natural boulders, carved bubbling rocks, and textured stone

Water Effect

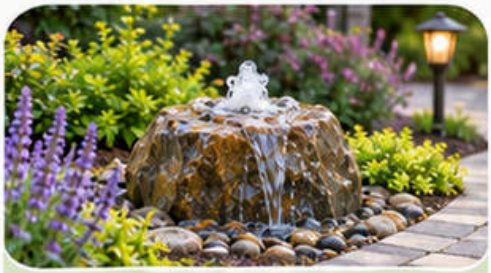

Soft bubbling water that gently flows over the stone

System

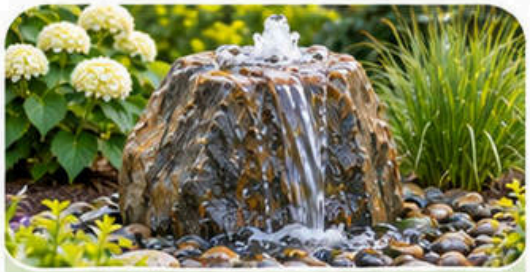

Hidden basin and recirculating pump below the rock

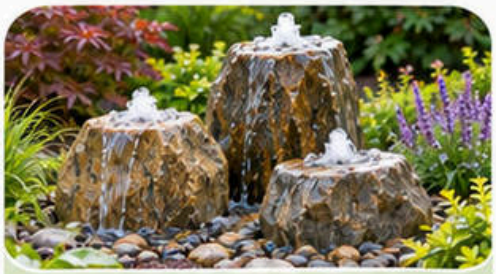

Popular Design Ideas

Small Accent

Medium Focal Point

Grouped Stones

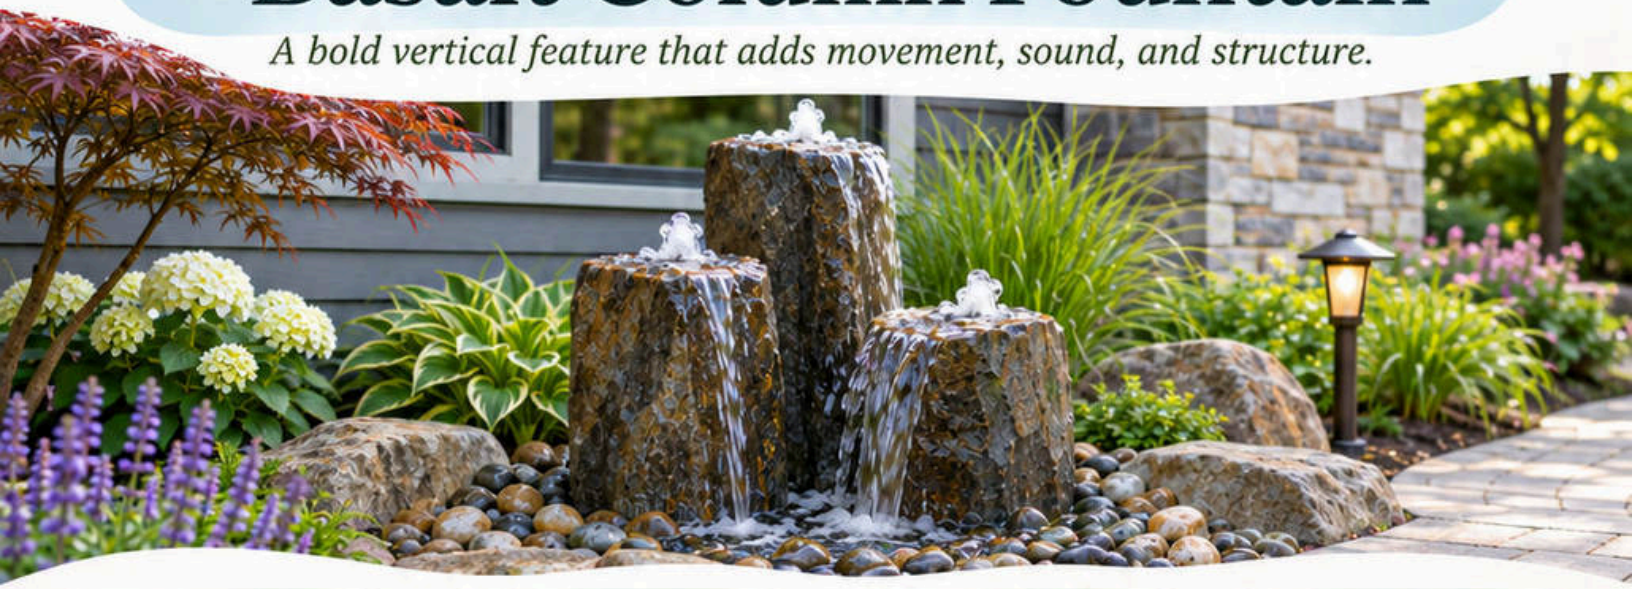

A great option when you want the sound of water without a large footprint.

Concept images for inspiration. Final selections are customized for each project.

Gardenboro
LANDSCAPING

Basalt Column Fountain

A bold vertical feature that adds movement, sound, and structure.

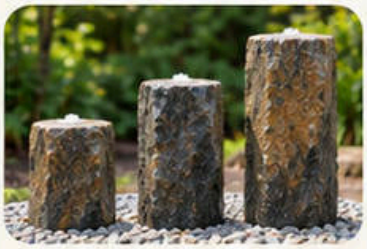

Best For

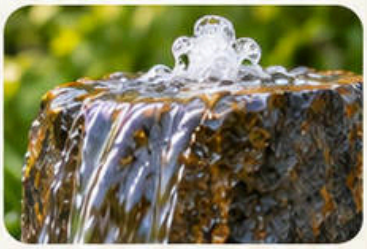

Modern beds, entry features, and strong focal points

Column Options

Single, double, or triple column groupings

Water Effect

Bubbling tops with water spilling down the column faces

System

Hidden basin, pump, and decorative river stone surround

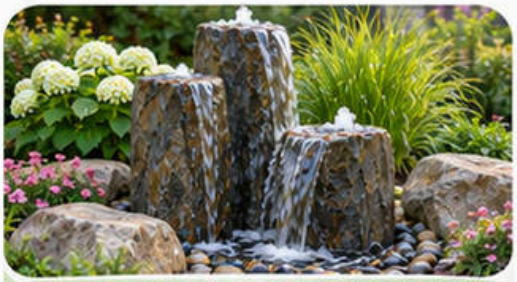

Popular Scale Options

Small

Medium

Large

Ideal when you want a clean vertical look with natural stone character.

Concept images for inspiration. Final selections are customized for each project.

Gardenboro
LANDSCAPING

Urn Fountain

A decorative fountain that combines gentle water sound with artistic style.

Best For

Patios, front beds, and decorative accent areas

Style Options

Classic urns, glazed vessels, and textured decorative jars

Water Effect

Water bubbling from the top and flowing softly around the vessel

System

Pump and basin hidden below the decorative feature

Popular Looks

Classic

Glazed

Natural Tone

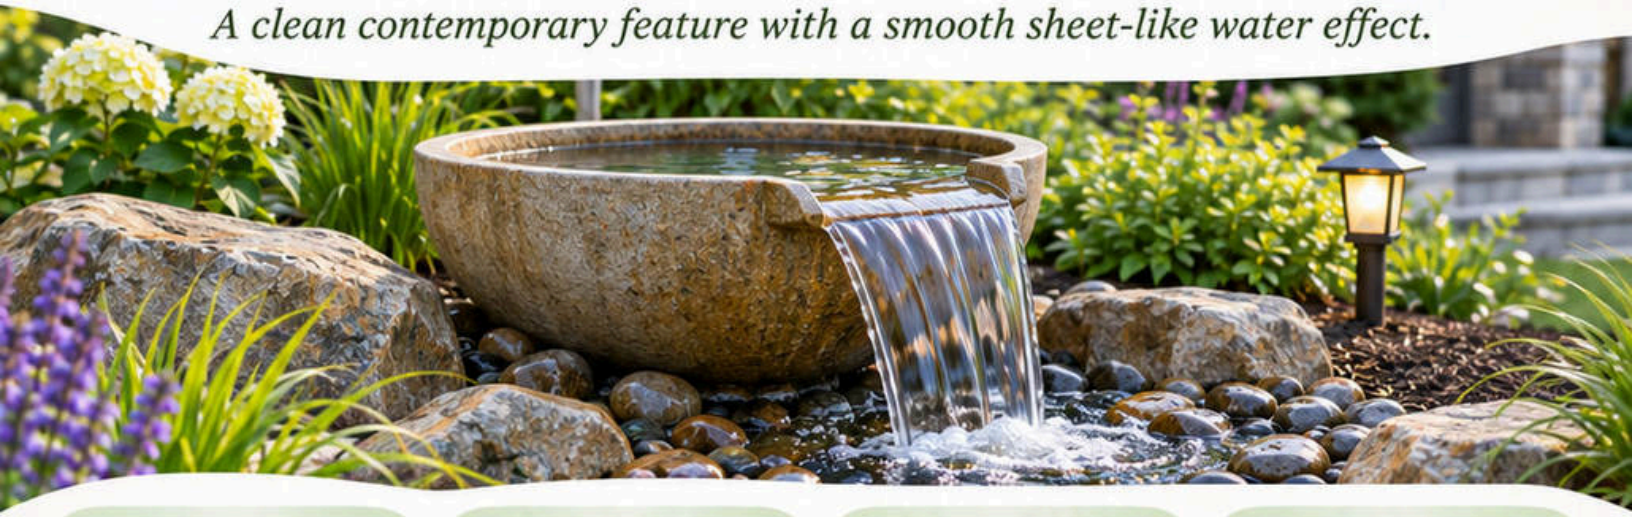

A good choice when you want a softer decorative feature with personality.

Concept images for inspiration. Final selections are customized for each project.

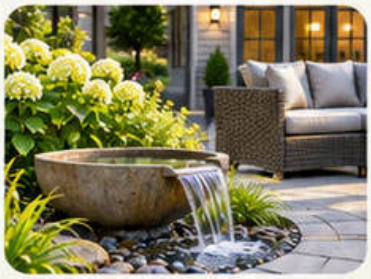

Gardenboro
LANDSCAPING

Spill Bowl Fountain

A clean contemporary feature with a smooth sheet-like water effect.

Best For

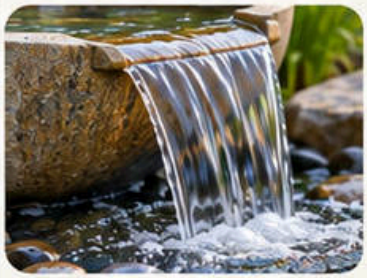

Modern landscapes, patio features, and clean-lined designs

Bowl Options

Round bowls, stone-look basins, and vessel-style spill bowls

Water Effect

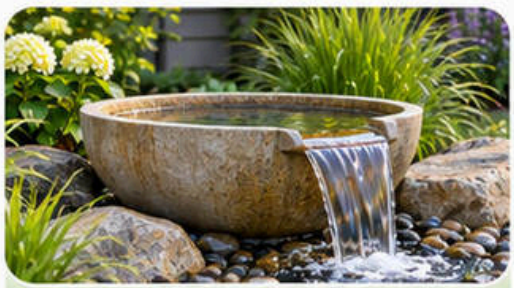

A steady spill from the bowl into stone or a lower basin area

System

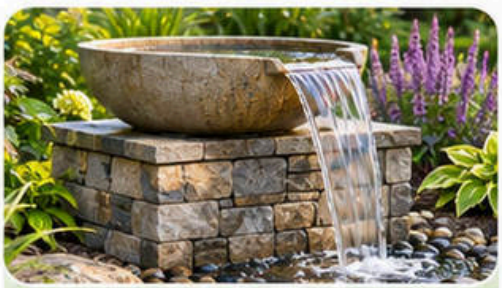

Hidden pump and basin system designed for recirculating flow

Popular Looks

Single Bowl

Raised Bowl

Layered Spill

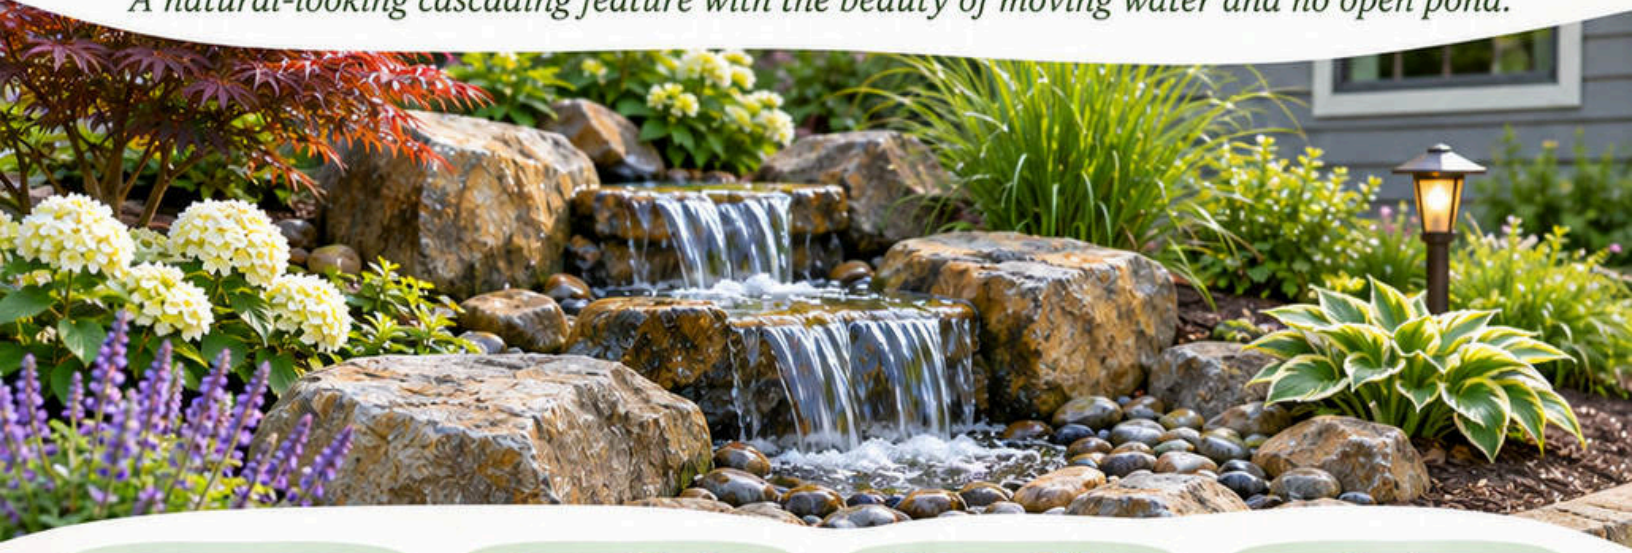

A strong choice when you want a contemporary look and a visible water sheet.

Concept images for inspiration. Final selections are customized for each project.

Gardenboro
LANDSCAPING

Pondless Waterfall

A natural-looking cascading feature with the beauty of moving water and no open pond.

Best For

Natural landscape projects, slopes, and larger focal areas

Stone Choices

Boulders, spill rocks, river rock, and mixed natural stone

Water Effect

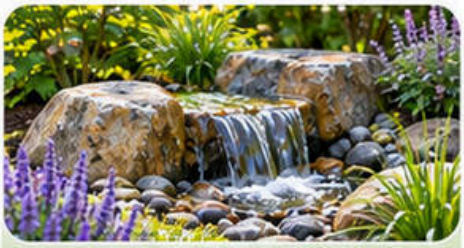

Cascading water over multiple stone levels for stronger movement and sound

System

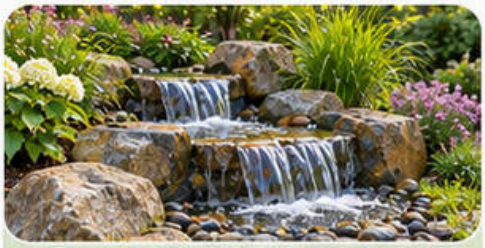

Hidden reservoir, pump, and recirculating waterfall basin

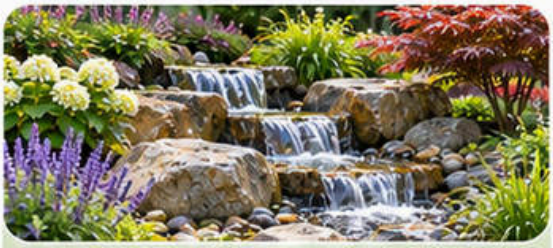

Popular Scale Options

Compact

Medium

Expanded

A great option when you want a more natural waterfall look without a pond.

Concept images for inspiration. Final selections are customized for each project.

What Makes It Work?

The attractive stones are only part of the design.

01 Feature Stone

Boulder, column, urn, bowl or spill rocks

02 Water Movement

Flow rate selected for the desired effect

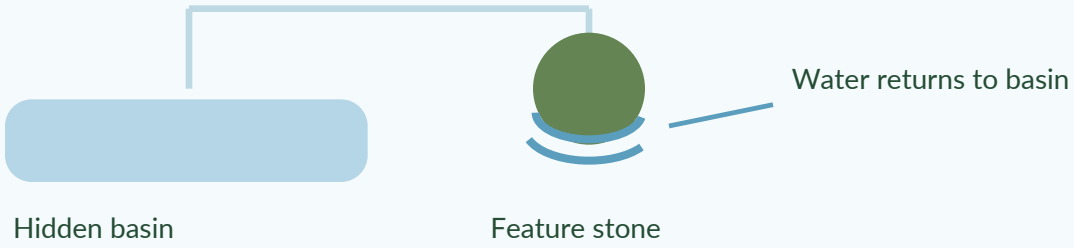

03 Recirculating Pump

Moves water from the basin back to the top

04 Hidden Reservoir

Captures and holds the returning water

A simple recirculating water feature

Site and safety checks matter.

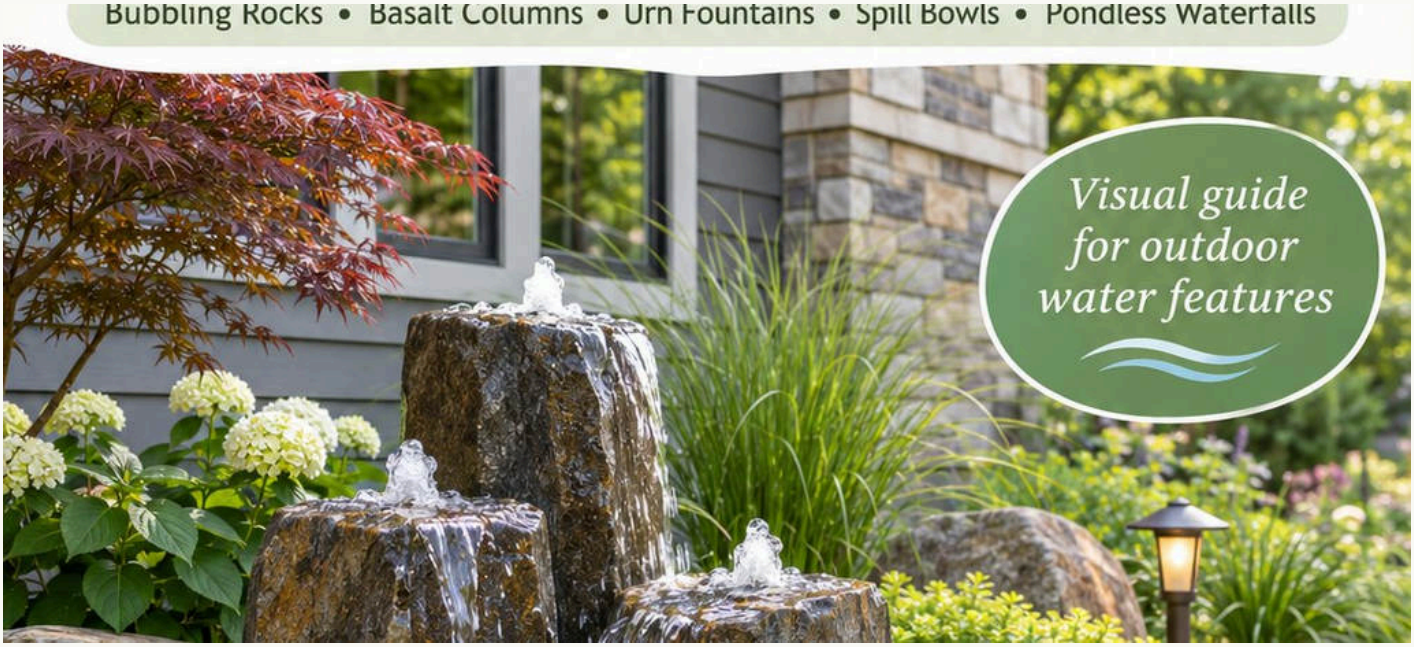

Pump capacity, splash control, reservoir access and water top-ups need review.

Electrical supply and GFCI protection must meet applicable requirements.

Let's Plan Your Water Feature

Start with the look you love. We will review the site and recommend a solution.

01 **Which feature is your favorite?**
Rock, basalt column, urn, bowl or waterfall.

02 **Where would you like it?**
Entry garden, planting bed, patio or another space.

03 **What look and sound do you prefer?**
Soft bubbling or more visible moving water.
